It is here that Anderson and Buchier is here that Anderson and Buchier itect the movements of tugs and scows ite men and discharge them, and above it direct the expenditure of nearly 800,000 annually. With telephonic communication with the seventeen dumps in he city and also with Commissioner andrews and Deputy Ryan, all the busies of the bure til seally transported.

John D. Dalley, according to his business cards, is a "contractor for water front filling, dredging &c." He has an office at 150 West One Hundred and Nineteenth street and another office in Broaf street. His work for the city in 150 remounted to only 212.935, but last year it, was swelled to \$49.789. This year fir, was swelled to \$49.789. This year fir, was swelled to \$10.789. This year fir, was swelled to \$10.789. This year fir, was swelled to \$10.789. and money paid, when the boats were not in use at ad.

If these seven "dummy" scows were put in the expense account, as the records show they were, it is a natural sequence that John D. Dailey was paid 500 each for unloading these seven "dummy" scows It would not balance on the books of the Departments to pay for the hire of seven scows if payment was not also made for unloading them. Seven scows at 500 means a little matter of 100 for Dailey.

A cubic yard of solid garbage will just about fill an asheert. Many of the carts, when their loads are dumped into the scows, are only half filled. At each of the dumpa a record is kept of the number of cartioads emptied into each soow, and the Department records give the number of loads to each isaded scow.

For instance, when a scow is ready to the seven was at 100 meters of loads to each isaded scow.

For instance, when a scow is ready to towed to Elker's Island for Dulley to load, a record is made by the captain the dump of 1-st how many cartacts, or, more properly spessing, how hany cubic yards, the scow contains.

Following are the official reports of he scows loaded at the different dumps in Jan. 6, 7, 8 and 9, 1894, with the numer of cart-loads or cubic yards in each cow:
